

SUMMARY

Forward-deployed AI engineer with hands-on experience building and deploying **AI-powered backend systems, neural network models, and LLM integrations**. Skilled in **Python, Node.js, and machine learning pipelines**, with a passion for improving healthcare operations through generative AI. Strong communicator who thrives in dynamic, high-growth environments—translating complex workflows into practical, data-driven products that deliver measurable value.

EDUCATION

Northeastern University, Boston, MA

M.S. in Information Systems

Expected Sep 2026

Amrutvahini College of Engineering, India

B.E. in Computer Engineering

Mar 2023

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, Java, Bash

AI & ML: LLMs, LangChain, OpenAI API, Neural Networks, TensorFlow, Scikit-Learn, Pandas

Backend: Node.js, Express.js, REST APIs, Microservices, Authentication, Nginx

Databases: MongoDB, PostgreSQL, MySQL

Cloud: AWS (EC2, S3, RDS, IAM, Lambda, CloudWatch)

DevOps: Docker, Terraform, GitHub Actions, Linux

Practices: Rapid Prototyping, Agile Collaboration, Debugging, CI/CD, API Integration

EXPERIENCE

Software Engineer – Geode Blockchain Co-op

Jan 2026 – Apr 2026

Sparticle Concepts LLC (Geode Blockchain)

- Deployed and customized the **Link-to-Geode system**, a routing microservice connecting distributed blockchain dApps.
- Built a **Node.js/Express redirector API** integrating LLM-assisted navigation for context-aware routing.
- Collaborated with the AI/ML team on **prompt workflows and model fine-tuning** for intelligent data routing.
- Configured **Nginx reverse proxy** and scaling for multi-domain AI services across environments.
- Delivered production-ready modules and documentation in agile sprints with cross-functional teams.

AWS DevOps / Backend Engineer

Jul 2023 – Oct 2023

Sumago Infotech, India

- Designed and maintained **Node.js** and Python APIs for data automation, logging, and analytics pipelines.
- Integrated **OpenAI APIs** to automate text generation and anomaly detection for internal tools.
- Used **Terraform** for AWS provisioning (EC2, S3, RDS) and implemented monitoring via CloudWatch.
- Conducted QA testing and debugging to improve API reliability and system uptime by 20%.
- Partnered with managers to align backend performance metrics with business objectives.

Full-Stack Developer Intern

Sep 2021 – Apr 2022

Sumago Infotech, India

- Developed **RESTful APIs** and dynamic React dashboards for internal analytics and management systems.
- Integrated **MongoDB** with Express.js for secure CRUD operations and fast data retrieval.
- Collaborated with QA and deployment teams to debug, document, and optimize backend performance.
- Contributed to **Docker-based container deployments**, reducing release turnaround by 30%.
- Applied **ML model integration and testing** to build automation prototypes for predictive insights.

PROJECTS

Sign Language Recognition System (Python + CNN + OpenCV)

- Built and trained a **CNN model** to classify American Sign Language gestures in real time using OpenCV.
- Applied augmentation and normalization to achieve **95% validation accuracy**.
- Deployed a Flask API for live translation; optimized latency 25% with TensorFlow GPU acceleration.
- Automated preprocessing and model tuning pipeline for reproducibility.

Geode Link Router (Node.js + Express + LLM Integration)

- Developed a redirect microservice connecting distributed Geode dApps through AI-driven routing.
- Integrated OpenAI API for prompt-based navigation and dynamic context handling.
- Improved routing latency by 20% and documented cross-domain deployment configurations.

Job Portal Web Application (MERN + AWS EC2)

- Designed and implemented a full-stack **MERN** job portal for employer and candidate management.
- Developed secure RESTful APIs for authentication, role-based access, and data persistence.
- Containerized the application using **Docker** and deployed on **AWS EC2** via GitHub Actions.
- Implemented CI/CD pipeline for automated builds and integrated AWS CloudWatch for uptime monitoring.

ADDITIONAL INFORMATION

Soft Skills: Problem solving, adaptability, client collaboration, communication, fast learning

Interests: Generative AI, healthcare technology, LLM deployment, neural networks, applied ML
